Asset tracking device

- A device that will safely and efficiently direct personal to physical asset location by the most direct route possible.
- Insert in the device the most recent and updated data sheet and other important documents.

Usage of the device

- For oil and gas personal to be able to search assets in the field via tag, asset class example (Exchangers/furnaces/PSV), and natural language.
- The device will provide the Best route option to physical asset location.
- Once the route is given to the operator the personal would be able to find the following: -
 - ✓ How far and long is the asset from your location, and whether you can go to it by walking or car.

- ✓ Detailed technical and safety information associated to the asset.
- ✓ Display data sheet and other important documents linked to asset tag number.

Product benefits

- 1) Make it easier for the oil and gas personal to find any equipment in the site in a safely manner.
- 2) Saving time.
- 3) It will help new joiners and guests to get familiar to our assets faster.
- 4) It will help the handing over person to be able to be in the right spot.
