Kuwait Integrated Petroleum Industries Company (KIPIC)

KIPIC was established on 18th October 2016 with a capital of KWD 1.8 billion, to be the first integrated, competent Kuwaiti company in downstream industry as a subsidiary to Kuwait Petroleum Corporation (KPC).

Our Vision

To be a leader in integrated refining and petrochemical operations and LNG supply that maximises shareholder value, achieves operational excellence, unlocks the potential of our people and cares for the community.

Our Mission

To operate an integrated complex that manufactures refined petroleum and petrochemical products and supplies Liquefied Natural Gas (LNG) after regasification in a reliable, efficient, safe and environmentally responsible manner while maximising profit, developing a professional and competent workforce and enabling Kuwaiti private sector's participation in the downstream petroleum industry.

Our Values

Integrity

Acting in a trustworthy manner with the highest standards of ethics, respect and honesty.

Innovation

Developing and embracing new ideas, methods and approaches to solving challenges that create value.

Excellence

Encouraging high performance, continuous Improvement and a customer focus.

One Team

Caring for the interests of KPC and ensuring alignment to achieve corporate and State goals.

Partnership

Building and sustaining relationships that support growth and enhance operational excellence.

Caring for People

Creating a culture where people develop and grow, and are positively motivated to contribute to the success of others.

Pride

Creating employee satisfaction on an individual Level and promoting a sense of loyalty and Belonging to KIPIC & KPC.

Commitment to HSSE

Respecting the environment and ensuring safety, security and the promotion of a healthy workplace wherever KPC operates.

KIPIC is responsible for operating and managing one of the most strategic & development state's projects the largest integrated complex which consist of three facilities:

Al-Zour Refinery

615,000 bpd capacity

The Liquefied Natural Gas Import Facility (LNGI)

3,000 BBTU per day capacity

Petrochemicals Complex (PRIZe)

to produce Aromatics and Polypropylene

These three projects will contribute to maximising national economy, diversifying sources of the national income, and providing local energy needs.

Al- Zour Refinery

Al- Zour Refinery, the world's largest grass-root refinery with 615,000 bpd capacity. It is implemented according to KPC upstream strategy 2040. When refining, Kuwaiti Light Export Crude (KEC), which represents 43.5% of the total refining capacity of the State of Kuwait.

This strategic project will utilise Kuwait Heavy Crude (KHC) and other types of crude to supply the power stations with clean fuels with 1% or less of sulphur content at a rate of 225 thousand barrels per day, in addition to 340 thousand barrels per day of high-quality refined petroleum products with low sulphur oil meeting the environmental specifications for export to global markets.

“ Al-Zour Refinery was ranked seventh globally among the 10 largest oil refineries in the world by the Global Refining Survey Report

Liquefied Natural Gas Import Facility (LNGI)

The LNGI project is part of KPC's long term strategic plan for the year 2030 to meet domestic fuel demand, with a maximum send- out of 3000 (BBTU/ Day) approximately 65000 (Ton/Day).

This project is considered the first of its kind in the State of Kuwait and it has been established to meet Kuwait's growing needs for cleanest fuel (natural gas) to generate electricity, as well as the needs of other natural gas consumers such as oil refineries and petrochemical industries.

The LNGI terminal has the flexibility to maintain the send-out natural gas to Ministry of Electricity & Water & Renewable Energy power station and exporting LNG at the same time, which contributes to providing additional quantities of crude oil and gas oil for supplying various markets, which ensures optimisation of oil wealth and maximising the benefits from it.

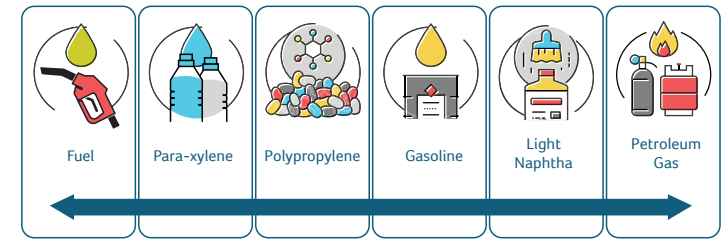

“ The liquefied Natural Gas Import Facilities is the first of its kind in the State of Kuwait

Petrochemicals Complex Project

The Petrochemicals Complex Project consists of the third olefins plant, the second aromatics plant, and the catalyst cracking unit.

Following the selection of manufacturing process licensors, preliminary engineering studies are currently being conducted for the petrochemical complex project in order to design the project on a global scale and integrate it with Al-Zour Refinery in order to produce high-quality products such as para-xylene, polypropylene, gasoline, and automobile fuel to meet the growing demand for automobile fuel in the local market as well as other products for export to global markets. The project also provides opportunities for project owners at the local level to develop more subsequent manufacturing industries.

Products that the project will provide

“ The design of the petrochemicals complex

Strategic Objectives

- Maximising value by enhancing constructive integration between refining operations, petrochemical and receiving the liquified natural gas to re-evaporate.
- Achieving operational excellence in terms of efficient and effective operations while maintaining health, safety, and environment.
- Developing internal capabilities to operate integrated assets at global levels.
- Manufacturing the necessary products to meet the needs of local and global markets.
- Encouraging the participation of the Kuwaiti private sector in refining and petrochemical operations.
- Contributing to diversifying the sources of income of the Kuwait Petroleum Corporation (KPC).

We are proud of our young employees

Organisational Philosophy

Making More Possible

We strive to maximise the value of Kuwait's hydrocarbon resources, using our industrial expertise over the years in order to increase the efficiency of the performance of our integrated industrial facilities by making more possible to truly energise Kuwait, its people and its local economy.

Al-Zour Oil Complex Laboratories are the largest one in the Middle East

“ Al-Zour Administration building with a unique design

Definition of KIPIC's Brand

The brand marquee uses a clean, strong, contemporary word marquee for both English and Arabic. This underpins and reinforces the solidity of the company and its commitment to Kuwait.

The combination of colors in the brand marquee represents the concepts of optimism, growth, openness, ambition, confidence, and security.

The principal inspiration and rationale behind the design of the stylised KIPIC 'K' graphic is integration and growth; it also represents Kuwait.

The various woven, overlapping and intersecting graphic lines represent KIPIC's integration of the petroleum industry.

Corporate Responsibility

We live by the high standards we set. As we create the second biggest oil city in Kuwait next to Ahmadi, we'll be turning a clear desert into a fully-fledged city, taking extra care to protect Kuwait's immediate and surrounding environment. Our success will be based on a culture of awareness and care throughout the organization. As we produce clean and environmentally friendly products, we will open new markets to the Kuwaiti oil sector. Because at KIPIC, the shades of green in our company logo are a constant reminder of our inherent bond to the environment and sustainability.

مسؤوليتنا المؤسسية

نعمل وفق أعلى المعايير لبناء ثاني أكبر مدينة نفطية بعد مدينة الأحمد في الكويت، سوف نحول صحراء جرداء إلى مدينة كاملة المرافق، مع بذل مزيد من العناية لحماية البيئة في الكويت والمحيطة بعملياتنا، ولضمان نجاح ذلك سنعمل بالتوازي على ترسيخ ثقافة الوعي بحماية البيئة في أرجاء الشركة. إن ظلال اللون الأخضر في شعار شركتنا هو تذكير دائم لرابطنا المتأصل بالبيئة والاستدامة.
